# FISAYO OBADINA

Full-Stack Software Engineer

Ogun, Nigeria | +234 906 978 3098 | olufisayobadina@gmail.com | GitHub: fisayo-dev | LinkedIn: fisayobadina

## PROFESSIONAL SUMMARY

Full-stack software engineer specializing in Go, TypeScript, Next.js, and Node.js, with fintech internship experience at Guaranty Trust (GTCO) and SQUAD building AI-powered and offline-first payment systems. Hackathon winner with a record of shipping production web applications end to end, from backend services and API integrations to performant, accessible interfaces. Seeking a full-stack or backend engineering internship contributing to real-world, scalable systems.

## TECHNICAL SKILLS

**Languages:** Go, TypeScript, JavaScript, SQL, HTML, CSS

**Frameworks & Libraries:** Next.js, React, Node.js, Express, Tailwind CSS, Prisma, Drizzle

**Databases & Storage:** PostgreSQL, MongoDB, Redis, Supabase, Appwrite

**Backend & APIs:** RESTful API design, server-side programming, JWT and OAuth authentication, third-party API integration

**AI & Automation:** LLM API integration, AI-powered document parsing, conversational and voice automation

**Tools & Practices:** Git, GitHub, Agile collaboration, SEO and web performance optimization, accessibility (WCAG)

## PROFESSIONAL EXPERIENCE

**Guaranty Trust Holding Company (GTCO)** **Jul 2026 – Sep 2026**

*Summer Intern, Software Engineering | Lagos, Nigeria (Hybrid)*

- Researched on an offline payment solution enabling GTCO customers to complete transactions over Bluetooth without an internet connection.
- Presented the capstone project to GTCO stakeholders, communicating system architecture and business impact to technical and non-technical audiences.

**SQUAD (Habari Pay)** **Jul 2026 – Sep 2026**

*Back End Developer Intern | Lagos Island, Lagos, Nigeria (Hybrid)*

- Owned the full backend implementation of an AI-powered support tool that automates outbound calls for SQUAD's customer support team.
- Built server-side services and APIs integrating artificial intelligence models to handle call initiation, conversation handling, and support workflows.

## PROJECTS

**Scanzie — SEO Analytics Platform** | Next.js, TypeScript, Node.js **Full-Stack Developer**

- Built an open-source SEO analyzer that runs automated visibility and health checks on websites.
- Designed backend processing for efficient SEO audits, reducing total analysis time per site.

**Loan Parser — Loan Document Extraction Tool** | Go, TypeScript, AI API **Full-Stack Developer**

- Developed an end-to-end application that parses loan documents into structured JSON and CSV output.
- Integrated a third-party AI API for document parsing and analysis, handling varied document formats.

**VerifyNG — Certificate Verification System** | React, TypeScript, Tailwind CSS **Frontend Developer**

- Built the entire user interface for a platform that verifies the authenticity of academic and professional certificates.
- Implemented an AI-powered verification API for fraud and deepfake detection in submitted certificates.

**Proofpay AI — Secure Shopping Marketplace** | Next.js, TypeScript, Tailwind CSS **Frontend Developer**

- Developed the marketplace user interface for a secure, escrow-style shopping experience.
- Implemented accessibility features to support users with disabilities across key user flows.

**Full-stack Creators — Campus Freelance Marketplace** **Frontend Developer**

- Built user interface features for a student-to-student freelance marketplace and improved page SEO and load performance using Scanzie.

## EDUCATION

**Covenant University** **Expected 2028**

*B.Sc. Industrial Mathematics (Computer Science Option) | Ota, Ogun State, Nigeria*

Relevant Coursework: Data Structures and Algorithms, Database Systems, Object-Oriented Programming, Web Development, Linear Algebra, Statistics and Probability.

## HACKATHONS & ACHIEVEMENTS

- Winner, JavaScript Mastery Hackathon (2024). 4th Place, Korapay Hackathon (2nd Edition).
- Top 5%, SQUAD Hackathon 3.0 — advanced to the 4th round, demonstrating technical and teamwork ability.
- Participant, AMD Developer, Appwrite, and Hacktoberfest hackathons. Cowrywise Campus Ambassador.
